

Changes in Mathematics Courses

Beginning in Fall Quarter 2019, the Department of Mathematics is reorganizing its standard calculus courses. Use the following chart to determine the new Mathematics prerequisites for Economics courses:

Current Course	New Course
MATH 220-0 <i>Differential Calculus of One Variable Functions</i>	MATH 220-1 <i>Single-Variable Differential Calculus</i>
MATH 224-0 <i>Integral Calculus of One Variable Functions</i>	MATH 220-2 <i>Single-Variable Integral Calculus</i>
MATH 230-0 <i>Differential Calculus of Multivariable Functions</i>	MATH 230-1 <i>Multivariable Differential Calculus</i>
MATH 234-0 <i>Multiple Integration and Vector Calculus</i>	MATH 230-2 <i>Multivariable Integral Calculus</i>

There are no changes to the following courses that are prerequisites for some Economics courses:

MATH 240-0 *Linear Algebra*

MATH 300-0 *Foundations of Higher Mathematics*

MATH 314-0 *Probability and Statistics for Econometrics*

However, beginning in Fall Quarter 2020, there will be an additional Mathematics prerequisite for MATH 314-0 (which is the standard prerequisite for ECON 381-1 *Econometrics*)

Current MATH 314-0 Prerequisites	MATH 314-0 Prerequisites from Fall 2020
MATH 220-0 <i>Differential Calculus of One Variable Functions</i>	MATH 220-1 <i>Single-Variable Differential Calculus</i>
MATH 224-0 <i>Integral Calculus of One Variable Functions</i>	MATH 220-2 <i>Single-Variable Integral Calculus</i>
	MATH 226-0 <i>Sequences and Series</i>
MATH 230-0 <i>Differential Calculus of Multivariable Functions</i>	MATH 230-1 <i>Multivariable Differential Calculus</i>
MATH 234-0 <i>Multiple Integration and Vector Calculus</i>	MATH 230-2 <i>Multivariable Integral Calculus</i>
